Deposit protection

This exclusive feature allows you to insure your deposit before opening a deal. The bigger your deposit is, the longer it can stay protected:

Deposit amount	Protection period
From \$50 to \$100	1 day
From \$101 to \$500	5 days
From \$501 to \$1000	10 days
From \$1001 to \$5000	14 days
Above \$5001	20 days

If during the period when the Deposit protection is active you happen to lose more than 90% of your deposit funds, we would refund them to you as bonus funds.

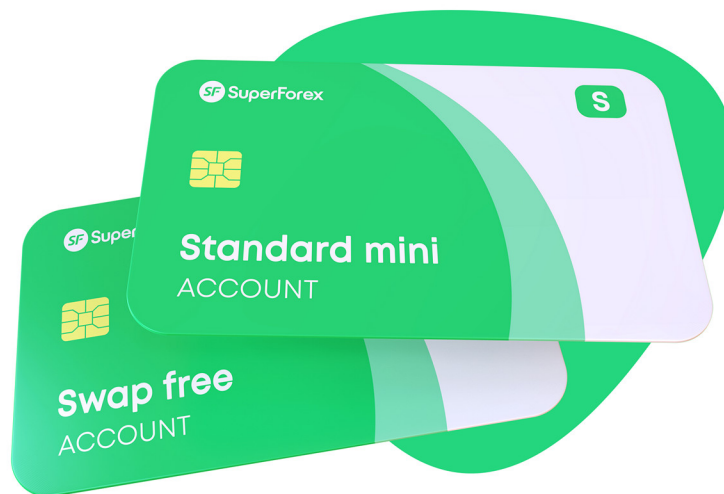

You can extend the period of Deposit protection by making a new deposit before the initial protection expires, as long as the new deposit has a longer protection than the first one.

Account types

SuperForex offers one demo account and 11 real account types to suit the most trading styles.

Next, we will consider the advantages of certain accounts.

Demo account

If you have no trading experience at all, you can start learning with a Demo account.

You do not invest money, but also can not receive profit.

STP accounts

The advantage of STP accounts is that there are no errors or delays in transactions due to human factors, as traders avoid other people interfering with their transactions.

Standard mini account

This is the main account type that will suit most traders. It is also used in the Forex copy system.

On the one hand, having no experience in Forex, you can earn money by copying transactions of experienced traders with a deduction of a certain fee to them.

On the other hand, if you are a trading guru, you can register as a Forex Copy Master and earn extra profit.

	Standard mini	Swap free	Micro cent
Min. deposit	\$1	\$1	–
Lot size	\$10,000	\$10,000	\$10,000
Spread	Fixed	Fixed	Fixed
Swap	Yes	No	Yes
Forex Copy	Yes	Yes	No

Swap free account

This is a kind of Standard mini account, but without swaps, which meets the requirements of Islam. Therefore, this account is also called Islamic.

Micro cent account

If you are new on Forex trading and want to minimize your risks, use the Micro Cent Account.

STP accounts

Another good reason to use STP accounts is greater liquidity as prices are purchased from multiple market participants rather than just one liquidity provider. This results in better execution, tighter dealing spreads and more accurate quotes.

No spread account

This account offers the possibility to engage in trading without paying any spreads when you open new deals.

Profi STP account

Profi-STP account conditions are optimized for ambitious traders who are interested in big volume trades.

	No spread	Profi STP
Min. deposit	\$100	\$500
Lot size	\$100,000	\$100,000
Spread	0	0
Swap	No	No
Forex Copy	No	No

Best ECN broker

In 2020-2021, we were awarded as the Best ECN broker in Africa by three different media.

ECN accounts

The main advantage of ECN accounts is the fastest execution of orders without price slippage. The speed varies from 0.05 to 2 seconds.

Another important indicator is the minimum costs for a trader, since spreads on ECN are floating and in some situations are equal to zero.

	ECN Standard	ECN Standard mini	ECN Swap free	ECN Swap free mini
Min. deposit	\$1	\$1	\$1	\$1
Lot size	\$100,000	\$10,000	\$100,000	\$10,000
Spread	Float	Float	Float	Float
Swap	Yes	Yes	No	No
Forex Copy	No	No	No	No

Crypto accounts

We deliberately combined 2 accounts from STP and ECN groups, because their main purpose is cryptocurrency trading.

In fact, their only difference is fixed or floating spreads.

	Crypto	ECN Crypto
Min. deposit	\$100	\$100
Lot size	1/10 BTC	1/10 BTC
Spread	Fixed	Float
Swap	Yes	Yes
Forex Copy	No	No

Funds security

To protect your money at all costs, we use a segregated funds policy. This means that your money is stored separately from company funds. This ensures that your money is not being used as SuperForex resources and does not fund our activities - it is only for your transactions.

SSL certificate

We use an SSL certificate to protect all data you enter on our website. SSL, or Secure Sockets Layer, is a protocol that allows a safe communication between you and our website.

Advantages for clients

Auto reset balance

If you make any mistakes during trading, they will gradually eat away at your deposits. Particularly bad situations can take that even below zero, putting you in debt.

This program compensates for your losses and will keep your balance at zero if it goes down. This way you will not owe and all your new deposits will be at your disposal.

Works automatically for all accounts.

Forex copy service

This is a system of copying deals, where followers automatically repeat the actions of the masters.

If you are novice in Forex, choose a master from masters table based on his balance, profit and traded lots.

A follower can copy trades with a leverage of 1:1, 2:1, 1:2, etc. So his profit will be calculated in the same proportion with master's profit.

A follower pays to master a profit share or a daily commission.

Depending on the master's strategy, one or another form of payment will be more profitable.
